The Journal of Gynecologic Oncology (JGO), the official journal of the Asian Society of Gynecologic Oncology and the Korean Society of Gynecologic Oncology, publishes the highest quality manuscripts dedicated to gynecologic oncology. Because of the nature of the journal, we think it is important to study using data from Asian region such as epidemiological data. JGO prefers studies of Asian epidemiologic data. Published six times per year online only, the journal aims at publishing evidence-based, scientifically written articles, including original articles, review articles, selected editorials, etc.

JGO has the online submission and editorial system. Manuscripts should be submitted online at http://www.editorialmanager.com/jgynecoloncol.

Authors who are unable to submit online and have objections to the submission process and peer review results should contact the Editorial Office.

Journal of Gynecologic Oncology

E-mail: jgo.editorial.office@gmail.com

Manuscript Categories

Original Articles are papers containing results of basic and clinical investigations, which are sufficiently well documented to be acceptable to critical readers. Maximum length of manuscript is 3,500 words of body text, excluding the abstract, references, figures, and tables. These articles are limited to 40 references.

Review Articles and Cooperative Group Reports are usually solicited by the Editor-in-Chief and describe concise review on subjects of importance to medical researchers. Authors who wish to submit an unsolicited review should contact the Editor-in-Chief to determine the appropriateness of their review for publication in JGO. These articles are limited to 4,500 words of body text, excluding the abstract, references, figures, and tables. The Editors also suggest a limit of 100 references.

Editorial and Expert Opinion are invited perspectives in gynecologic oncology, dealing on very active areas of research, fresh insights and debates.

Correspondence (Letters to the Editor) may be in response to a published article, or a short, free-standing piece expressing an opinion. If the Correspondence is in response to a published article, the Editor-in-Chief may choose to invite the article’s authors to write a Correspondence reply. Correspondence should be no longer than 1,500 words in length.

Meeting Reports are usually solicited by the Editor-in-Chief among the important meetings in the field of gynecologic oncology.

Book Review can be published.

Correction/Revision/Addendum/Retraction, these kinds of editorial notice may be published.

Video Articles JGO now welcomes Video Articles. Through Video Articles submissions, authors can present novel surgical techniques, treatments or interventions for clinical care or research in gynecologic oncology. Video Articles are published in full online including abstract, manuscript (not mandatory), video file, and still image. All submitted files should be properly labeled so that they directly relate to the Video Articles' content. Video files supplied will be published online in the electronic version of your article.

JGO is not accepting case reports at this time.

Video article should not be used as an alternative to a case report.

Any article longer than these limits should be discussed with the editor.

Editorial Policies for Authors

Open access JGO is an open access journal. Articles are distributed under the terms of the Creative Commons Attribution License, which permits unrestricted non-commercial use, distribution, and reproduction in any medium, provided the original work is properly cited. Permission must be requested from the Editorial Office of JGO to use tables or figures appearing in the journal in other periodicals, books, or media for scholarly and educational purpose. This procedure is in accordance with the Budapest Open Access Initiative definition of open access.

The journal also follows the open access policy of PubMed Central at United States National Library of Medicine (http://www.ncbi.nlm.nih.gov/pmc/).

All contents of the journal are available immediately upon publication without embargo period.

Archiving policy The full text of JGO has been archived in PubMed Central (https://www.ncbi.nlm.nih.gov/pmc/journals/883/) from the volume 19, 2008. According to the deposit policy (self-archiving policy) of Sherpa/Romeo (http://www.sherpa.ac.uk/), authors cannot archive pre-print (i.e., pre-refereed) versions, but they can archive post-print (i.e., final draft, post-refereed) versions. Authors can archive the publisher’s version/PDF. JGO provides the electronic backup and preservation of access to the journal content in the event the journal is no longer published by archiving in PubMed Central.
Authorship
In accordance with the ICMJE, each author should have participated sufficiently in the work to take public responsibility for the content (http://www.icmje.org/recommendations/browse/roles-and-responsibilities/defining-the-role-of-authors-and-contributors.html). All other contributors who do not meet sufficient criteria for authorship should be noted in the Acknowledgments section.

The number of authors listed on the manuscript should not exceed seven for regular articles (except in the case of cooperative group reports or multicenter trials); five for Review Articles; and three for Correspondence. Cooperative group report refers to a study in which two or more departments or institutions are mainly involved. If your manuscript is a cooperative group report or multicenter trial, the article type must be selected as Cooperative group at the first step of e-submission to ensure a sufficient number of authors. Maximum number of co-first authors is two. Co-correspondence (maximum two) is permitted only for a cooperative group report or multicenter trial. Please check the report of Committee on Publication Ethics (COPE) for more information on the author (https://publicationethics.org/resources/guidelines-new/how-handle-authorship-disputes-guide-new-researchers). All authors should identify specific contributions to research in Submitting Step 7 as the following areas: Conceptualization, Methodology, Validation, Formal analysis and investigation, Writing - original draft preparation, Writing - review and editing, Funding acquisition, Resources, and Supervision.

Changes to authorship
Authors are expected to consider carefully the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved by the journal Editor. To request such a change, the Editor must receive the following from the corresponding author: (a) the reason for the change in author list and (b) written confirmation (e-mail letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed.

Only in exceptional circumstances the Editor will consider the addition, deletion or rearrangement of authors after the manuscript has been accepted. While the Editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum.

Conflict of interest
All contributors to JGO are required to disclose financial and other relationships with entities that have investment, licensing, or other commercial interests in the subject matter under consideration in their article. These disclosures should include, but are not limited to, relationships with pharmaceutical and biotechnology companies, device manufacturers, or other commercial entities whose products or services are related to the subject matter of the submission. On behalf of all authors, the corresponding author should answer the question in submission process.

Ethics
For clinical trials, details of ethical committee approval and the type of informed consent should be stated in the Methods section. Especially, for studies of humans including case reports, state whether informed consents were obtained from the study participants. The editor of GOG may request submission of copies of informed consents from human subjects in clinical studies or IRB approval documents. Patients’ and volunteers’ names, initials, and hospital numbers should not be used. We endorse the principles embodied in the Declaration of Helsinki and expect that all investigations involving human materials have been performed in accordance with these principles. For animal experiments, it is expected that investigators will adhere to the ‘Guide for the Care and Use of Laboratory Animals. If the author need informed consent form, you can download it from the JGO website (https://ejgo.org/index.php?body=instructions).

Research and publication ethics
The JGO adheres to the ethical guidelines for research and publication described in “Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals” (http://www.ICMJE.org) and “Guidelines on Good Publication” (http://www.publicationethics.org.uk/guideline). When JGO faces suspected cases of research and publication misconduct such as a redundant (duplicate) publication, plagiarism, fabricated data, changes in authorship, undisclosed conflicts of interest, an ethical problem discovered with the submitted manuscript, a reviewer who has appropriated an author’s idea or data, complaints against editors, and other issues, the resolution process will follow the flowchart provided by the COPE (http://publicationethics.org/resources/flowcharts). Editorial Board will discuss the suspected cases and reach a decision. The journal will not hesitate to publish errata, corrigenda, clarifications, retractions, and apologies when needs.

For the policies on the research and publication ethics not stated in this instructions, ‘Good Publication Practice Guidelines for Medical Journals (https://www.kamje.or.kr/board/view?b_name=bo_publication&bo_id=7)’ or ‘Guidelines on good publication (http://www.publicationethics.org.uk/guideline)’ can be applied.

Data sharing statement
JGO accepts the ICMJE Recommendations for data sharing statement policy (http://icmje.org/icmje-recommendations.pdf). All manuscripts reporting clinical trial results should submit a data sharing statement following the ICMJE guidelines from 1 Feb 2019.

Selection and description of participants
Ensure correct use of the terms sex (when reporting biological factors) and gender (identity, psychosocial or cultural factors), and, unless inappropriate, report the sex and/or gender of study participants, the sex of animals or cells, and describe the methods used to determine sex and gender. If the study was done involving an exclusive population, for example in only one sex, authors should justify why, except in obvious cases (e.g., gynecologic cancer). Authors should define how they determined race or ethnicity and justify their relevance.

Copyright and permissions
All published papers become the permanent property of the Asian Society of Gynecologic Oncology and the Korean Society of Gynecologic Oncology. Upon publication of an article, a representative author should upload a Copyright Transfer Form. Please download Copyright Transfer Form.pdf in the journal homepage (https://ejgo.org/index.php?body=instructions).
org/index.php?body=instructions). If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article.

**Reporting guidelines**

JGO has incorporated specific guidelines for reporting randomized controlled trials (i.e., CONSORT), meta-analyses and systematic reviews of randomized controlled trials (i.e., PRISMA), meta-analyses and systematic reviews of observational studies (i.e., MOOSE), observational studies (i.e., STROBE), studies of diagnostic accuracy (i.e., STARD), tumor marker prognostic studies (i.e., REMARK), qualitative research studies (i.e., SRQR), bioscience research using laboratory animals (i.e., ARRIVE), the minimum content of a clinical trial protocol (i.e., SPIRIT), and a tool to improve reporting of clinical practice guideline (i.e., AGREE), etc. In your cover letter and main text of manuscript, be sure to indicate that you have followed these guidelines as appropriate. The checklists and guidelines are available on our web site ([https://ejgo.org/index.php?body= guideline](https://ejgo.org/index.php?body= guideline)).

**Clinical trial registration**

JGO has endorsed the statement from the ICMJE that all clinical trials must be enrolled in a central registry in order to be considered for publication. This requirement will lessen the chance of publication bias by making all trials (published or unpublished) available to clinicians, investigators, and the public, even those that are negative or reflect unfavorably on a research sponsor’s product.

**Article processing charges**

There are no page charges for submission or publication. If an errata, corrigenda, retractions, and apologies occurs due to the author’s circumstances after the final publication, the author may be charged the corresponding expense.

**Originality and duplicate publication**

All submitted manuscripts should be original; further, they should not be under consideration for publication by other scientific journals. Any part of the accepted manuscript may not be duplicated in any other scientific journal without the permission of the editorial board. If duplicate publication related to a paper in our journal is detected, the author(s) will be named in the journal, and the respective institute(s) of affiliation will be informed; additionally, there will be penalties for the author(s).

**Secondary publication**

Is it possible to republish manuscripts if they satisfy the conditions of secondary publication in the “Uniform Requirements for Manuscripts Submitted to Biomedical Journals.”

**Manuscript Preparation Guideline**

JGO will consider manuscripts prepared in accordance with the “Uniform Requirements for Manuscripts Submitted to Biomedical Journals.” Manuscripts may be returned that do not adhere to JGO’s instructions for authors.

All pages of a submission should be numbered and double spaced with a margin of 2.5 cm (1 inch) on every side. Line numbers should be included throughout abstract and the main body of the manuscript. Arial or Times New Roman at 10 pt size are recommended fonts for all text.

In order to help the manuscript writing of the author, JGO provide the example of manuscript format by Microsoft Word format (.docx) in JGO website ([https://ejgo.org/index.php?body=instructions](https://ejgo.org/index.php?body=instructions)) and JGO submission site ([http://www.editorialmanager.com/jgynecoloncol](http://www.editorialmanager.com/jgynecoloncol)).

**Title page**

The Title page must contain the following information: (1) succinct title of the report; (2) author list of 7 or fewer names; (3) names of each author’s institutions and an indication of each author’s affiliation; (4) ORCID ID of all authors; (5) acknowledgements of research support; (6) name, address, and e-mail address of the corresponding author; (7) running head of fewer than 50 characters (including spaces); (8) list of where and when the study has been presented in part elsewhere, if applicable; and (9) disclaimers, if any. The title page should be submitted as a separate file from manuscript file.

**Manuscript except title page**

**Abstract**

Abstracts are limited to 250 words and must appear after the title page. Abstracts must be formatted according to the following headings: (1) Objective, (2) Methods, (3) Results, and (4) Conclusion. A non-structured abstract is applied to news and cooperative groups. Abstract is not required for editorials or for correspondence. At the bottom of abstract page, up to six keywords should be listed to be used as index terms. For the selection of keywords, refer to Medical Subject Heading (MeSH) in Index Medicus.

**Main text**

Organize the manuscript into four main headings: (1) Introduction, (2) Materials and Methods, (3) Results, and (4) Discussion. Other descriptive headings and subheadings may be used if appropriate. The body of manuscript should be written as concisely as possible and must not exceed the manuscript category word limits described herein.

**Introduction** should orient the reader to the purposes of the study and should be as concise as possible, without subheadings.

**Materials and Methods** should be sufficiently detailed to enable the experiments to be reproduced. Appropriate IRB or IACUC approval for the research should be obtained and stated in text. Also, the statistical analysis and software programs used should be described.

**Results** should present detailed description of the findings in the text and/or tables and figures. But, excessive repetition of tables and figure contents should be avoided.

**Discussion** should appraise implications of the findings and place them in the context of prior reports. Speculation is permitted, but it must be supported by the presented data of authors and be well founded.

**Conflict of interest**

Under a subheading “Conflict of Interest Statement,” all authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence their work.

https://ejgo.org
Acknowledgments
All persons who have made substantial contribution, but who are not eligible as authors are named in acknowledgment.

References
References must be listed and numbered after the body text in the order in which they are cited in the text. Published manuscripts and manuscripts that have been accepted and are pending publications (in press) should be cited in the reference list. When a reference is an abstract or supplement, it must be identified as such in parentheses at the end of the reference. When a reference is unpublished data, a manuscript in preparation, or a manuscript submitted but not in press, it should be included in parentheses in the body of the text, and not cited in the reference list.

Limitation
- Original Articles: 40 references
- Review Articles: 100 references
- Video Articles: 5 references

Abbreviations of medical periodicals should conform to those used in the latest edition of Index Medicus and on MEDLINE. The “List of Journals Indexed in Index Medicus” includes the latest abbreviations. List all authors up to six. If more than six, list the first six and add “et al.”

Reference style
- Journal articles with more than six authors
- Book
- Book chapter
- Conference/meeting presentation
- Internet resource

Tables
Tables must be cited in the order in which they appear in the text using Arabic numerals. Table footnotes should be indicated with superscript symbols in sequence: *, †, ‡, §, ††, ‡‡, **, †††, ‡‡‡. The table’s legend may include any pertinent notes and must include definitions of all abbreviations and acronyms that have been used in the table. Tables submitted with multiple parts will be renumbered. Please note that JGO does not allow table pieces, such as Table 1a and 1b. Formats accepted on first submission are .eps, .tif, .jpg, and .ppt.

Figures
Figures must be cited in the order they appear in the text using Arabic numerals. Figure legends should appear within the document in a separate section just before the references. Figure legends are required for all article types. All relevant and explanatory information extraneous to the actual figure, including figure part labels, footnotes, abbreviations, acronyms, arrows, and levels of magnification in insets, should be defined in the legend text. Figure legends must not exceed 55 words per figure. Formats accepted on first submission are .eps, .tif, .jpg, and .ppt.

Photographs (radiographs, CT/MRI scans, and scanned images) must have a resolution of at least 300 dpi. Figure parts should not have figure numbers or letters embedded in the photographs. Labels may be placed on top of the image or set outside of each part. For Original Articles, there is normally a limit of 6 figures and tables (total) per manuscript. Additional figures and tables may be considered as supplements for Web-only publication.

Video articles preparation guideline
Authors who wish to submit Video Articles are strongly encouraged to adhere to the requirements detailed below.

Requirements:
1. Formats accepted for conversion include: mpg, avi, mov, wma, wmv, swf, rm, fla.
2. An audio narration in English must accompany the video.
3. No music sound tracks.
4. Annotation of anatomic structures is encouraged.
5. Please provide a video ‘still’ image file as well. It can be any frame from the video or may be a separate.
6. There should be a “manuscript” submitted with the video that includes a title page, unstructured abstract, and disclosures, as well as references if needed.
7. An unstructured abstract of no more than 250 words is required so that the submission is indexed in PubMed.
8. The text replace with the video file and still image.
9. A video file should be submitted by using a URL/URI/External Resource.

Below are some examples of an accepted Video Article. “https://ejgo.org/Synapse/Data/PDFData/1114JGO/jgo-26-155.pdf” (Sample Video Articles submission)

Writing style and terminology
All JGO submissions and editorial correspondence should be written in clear concise English. American English style and usage is preferred. JGO prefers the spelling in accordance with US requirements. If you are not a native English speaker, you may use professional editing services before submission. Any abbreviations or acronyms used should be defined at first use in the main body of the article. Authors should always use the generic names of drugs unless the proprietary name is directly relevant.

Units of measurement
Authors should express all measurements in conventional units, with Système International (SI) units.

https://ejgo.org
How to Submit a Manuscript
JGO has the online submission and peer review system. Manuscripts should be submitted online at http://www.editorialmanager.com/jgynecoloncol. Authors may submit manuscripts and trace their progress to the final decision.

Formatting
To facilitate the review process, manuscripts must be in Microsoft Word format (.doc or .docx). Do not reveal your identity anywhere in the document.

Submitting
Register as a new user or log in to http://www.editorialmanager.com/jgynecoloncol. At the initial screen, click on “Submit New Manuscript.” And then, follow steps 1-7.

Step 1. Select Article Type
Choose the article type of your manuscript from the pull-down menu. If your manuscript is a Cooperative group report or multicenter test, the article type must be selected as Cooperative group to ensure a sufficient number of authors.

Step 2. Attach Files
Please upload several files including cover letter, Title page, Manuscript without title page, and Conflicts of Interest. When uploading a revised file, you must delete the existing files and upload only the final manuscript, tables, figures, response to reviewer, and Manuscript (Rev)-Highlight file.

Step 3. General Information
- Keywords: Please enter keywords separated by semicolons. Each individual keyword may be up to 256 characters in length. Author should use the appropriate terminology as the keywords by referring to MeSH (https://www.ncbi.nlm.nih.gov/mesh).
- Classifications: Please identify your submission’s areas of interest and specialization by selecting one or more classifications.

Step 4. Review Preferences
- Please suggest 2 potential reviewers for this submission and provide specific reasons for your suggestion in the comments box for each person. This is mandatory process.
- Please identify anyone who you would prefer not to review this submission. This is not mandatory process.

Step 5. Additional Information
- Author should answer the following question; approval from all co-authors, the submitted history of the article, submission checklist check status before submission and possible return if not suitable, Data sharing Policy of ICMJE, and clinical trial registration status.
- On behalf of all authors, the corresponding author should fill up the form or question in submission process.

Step 6. Enter Comments
Please enter any additional comments you would like to send to the publication office. These comments will not appear directly in your submission.

Step 7. Manuscript Data
- Full Title and Short Title (less than 50 characters)
- Abstract (less than 250 words)
- Authors: Please state all authors’ first name, last name, e-mail address, ORCID, and contributor roles.
- Funding Information: If present, please displays the funder’s name, number, and grant recipient.

Editorial and Peer Review Process
The Editor selects peer reviewers by using reviewer suggested by authors, by recommendation of the Editorial Board members or from the specialist database owned by the Editorial Board.

Acceptance of the manuscript is decided, based on the critiques and recommended decision of the reviewers. A reviewer’s decision is made as “Accept,” “Minor revisions,” “Major revisions”, and “Reject”. If there is marked discrepancy in the decisions between two referees or in opinions between the author and reviewer(s), the Editor may send the manuscript to another reviewer for additional comments and recommended decision. Two repeated decisions of “Major Revision” are regarded as “Reject”. The reviewed manuscripts are returned back to the corresponding author with comments and recommended revisions.

The peer review process takes usually four to eight weeks after the manuscript submission. Revisions are usually requested to take account of criticism and comments made by reviewer. Failure to resubmit the revised manuscript within two months is regarded as a withdrawal. The corresponding author must indicate clearly what alterations have been made in response to the reviewers’ comments point by point. Acceptable reasons should be given for noncompliance with any recommendation of the reviewers. When submitting a revised manuscript, the author should upload the files that will be used for the final publication, Response to Reviewers that appropriately answer to comments of reviewers, and Manuscript (Rev)-Highlight that revised parts were highlighted to the system.

A final decision on acceptance or rejection for publication is forwarded to the corresponding author from the Editorial Office.

After Acceptance

Proofs and corrections
Proofs will be sent to the corresponding author via e-mail as a pdf file. The corrected proof should be returned to the principal editor in charge, preferably by email, within two days of receipt. Changes that have been made to conform to journal style will stand if they do not alter the authors’ meaning. The publisher reserves the right to deny any changes that do not affect the accuracy of the content.
